

Work plan linguistic development

Assignment today: Decide what to work with in order to upgrade your English. Points to consider:

- Make a realistic assumption about the amount of time you need. You don't want to feel stressed nor dissatisfied with your work.
- It's good to work with things you are good at but make sure you challenge yourself somehow.
- You are not graded on the results of your work unless something great comes out of it but you will be graded on how well you manage your learning during these sessions.
- The more efficiently you learn to use these sessions the better your English becomes.
